

FIRST WASH®

Firefighters Initial Action For Removing Cancer Causing Contaminants

In a three-year study completed in 2005 by the University of Cincinnati, researchers concluded that firefighters face a:

- 102% greater chance of contracting testicular cancer than any other type of worker;
- 53% greater chance of multiple myeloma;
- 51% greater chance of non-Hodgkin lymphoma;
- 39% greater chance of skin cancer;
- 32% greater chance of brain cancer;
- 28% greater chance of prostate cancer;
- 22% greater chance of stomach cancer;
- 21% greater chance of colon cancer.

That's why we developed **FIRST WASH®**

Designed for the First Responder To Self-Wash Structural Fire Contaminants Off Their Turnout Gear Before Removing Any PPE

Quick Connects To Apparatus Booster or Trash Line

Mounts In Seconds To First Wash Fixed Mounted Bracket on Apparatus and is secured with attached Locking Tethered Pin

\$ 789.00
Quantity Discounts Available

Patent Pending

5 Year Warranty

For Every First Wash System Purchased, A 3% of Invoice Donation Goes to the International Fire Fighter Cancer Foundation

- All Metal Construction
- Impact resistant ABS Deluge Shower Head
- Powder Coated For Lasting Durability
